

ECE 4180 Final Project Rubric

Score:	0 Points	10 Points
Project Proposal Rubric	Did not turn in a Final Project Proposal/All questions are left blank	Turned in Final Project Proposal. Proposals with lacking answers will be provided feedback that is expected to be reflected on in final deliverables

Score:	0 Points	1-9 Points	10 Points
Presentation	Did not present the final project (Project score of 0)	Presentation does not highlight features clearly. Group was not able to describe in detail/answer certain questions	Demonstration clearly shows all features. I can easily use the project physical myself. Students can clearly answer questions and explain their process.

Score:	0 points	0-2 Points	0-2 Points	0-2 Points	0-2 Points	0-2 Points
Report Rubric	Did not turn in a Final Project Report as a README on GitHub	Clearly describes what project does	Clearly describes what each peripheral's purpose is	Clearly describes any issues with the project	Clearly describes how project is different from similar ones	Clearly describes what else you would add to your project if more time/resources

Score:	0 Points	0-8 Points	0-2 Points
Code Rubric	Did not turn in any programming files. Code is not cited and clearly copied (Project score of 0)	Turned in all programming files to GitHub. APIs and other libraries are cited.	Code is clearly commented for any user to understand

Score:	0 Points	5-9 Points	10 Points
Circuit Diagram Rubric	Did not turn in a Circuit Diagram included in the README report on GitHub	Circuit diagram is missing peripherals, lack of connections	Circuit Diagram clearly shows all peripherals and how they are connected

Score:	0 – 9 Points	10-19 Points	20-29 Points
Quality of Project	Project is trivial or overly simple. Shows lack of creativity on all fronts. Does not meet class definition of an embedded system	Project shows some extra effort, but still simple and little creativity	Project has some creativity not too simple, but not advanced complexity. Project may also not have been able to implement something other groups were able to. Okay Quality
Score:	30-39 Points	40-50 Points	
Quality of Project Continued	Project is of an acceptable quality, uses multiple peripherals for input and output, good creativity. Good complexity	Project is of an exceptional quality. Something very outside of the box. Use of peripherals is complex and makes perfect sense for application	

Submission Points may be taken off for:	Did not use the enterprise GitHub and added dfratta3 to it by April 25 th	Did not make the repository private	Did not provide a link to the repository for the Canvas submission	Deliverables for the project needed to be downloaded and were not viewable on the repository
